BUTLER COUNTY WATER MAIN FLUSHING SCHEDULED

The Butler County Department of Environmental Services (BCDES) will be flushing water mains in July. The flushing helps remove deposits and sediments from the inside of the pipe to maintain high water quality. A detailed flushing schedule is available at 513-887-3969.

Customers may see temporary changes in their water during the testing.

- **Pressure Fluctuations** due to water routing and the high flow rate when the hydrants are opened.
- **Milky, Cloudy or Bubbly Water** caused by fine air bubbles in the water. This is harmless and should disappear within seconds.
- **Rust Particles, Sediment or Brown Water** occurs when deposits are stirred up as the lines are flushed. Customers can flush the lines in their house by running the tap farthest from their water main for two to three minutes until water runs clear.

Colored sediment can stain laundry. If staining occurs, keep clothes moist and call BCDES. They will provide a product that may remove discolorization from clothing. Customers can also use all-purpose rust and stain remover.

For more information, please call BCDES at **513-887-3066**.

BCDES Water Main Flushing Schedule
